Empire State Building, New York City. When it was finished in 1931 the Empire State was the tallest building in the world, and it stayed that way for forty one years until the Twin Towers overtook it in 1972. Official records show that five workers died during its construction. Photographs like this one make you wonder why that number isn't higher. Of course, the photographer was also up there.

Some elements that are very rare in the primary world could be abundant in a secondary world, or vice versa. E.g. gold & platinum everywhere but not much iron. ! Magical/pseudoscience elements: mithril, adamant, æelement zero•, orichalcum, quantum. ! Don't make something that will solve all problems! New elements should create new problems.
