Active Calculus is different from most existing texts in that: the text is free to read online in .html or via download by users in .pdf format; in the electronic format, graphics are in full color and there are live .html links to java applets; the text is open source, so interested instructor can gain access to the original source files via GitHub; the style of the text requires students to ...

### **Active Calculus: Single Variable: Matthew Boelkins, David**

Calculus (from Latin calculus, literally 'small pebble', used for counting and calculations, as on an abacus) is the mathematical study of continuous change, in the same way that geometry is the study of shape and algebra is the study of generalizations of arithmetic operations.. It has two major branches, differential calculus (concerning instantaneous rates of change and slopes of curves ...

Active Calculus - single variable is a free, open-source calculus text that is designed to support an active learning approach in the standard first two semesters of calculus, including approximately 200 activities and 500 exercises. In the HTML version, more than 250 of the exercises are available as interactive WeBWork exercises; students will love that the online version even looks great on ...

Lambda calculus (also written as  $\lambda$ -calculus) is a formal system in mathematical logic for expressing computation based on function abstraction and application using variable binding and substitution. It is a universal model of computation that can be used to simulate any Turing machine. It was first introduced by mathematician Alonzo Church in the 1930s as part of his research of the ...

Section 1-1 : Functions. In this section weâ€™re going to make sure that youâ€™re familiar with functions and function notation. Both will appear in almost every section in a Calculus class so you will need to be able to deal with them.

### **Calculus I - Functions**

In this section we define the derivative, give various notations for the derivative and work a few problems

illustrating how to use the definition of the derivative to actually compute the derivative of a function.
