Major depressive disorder (MDD), also known simply as depression, is a mental disorder characterized by at least two weeks of low mood that is present across most situations. It is often accompanied by low self-esteem, loss of interest in normally enjoyable activities, low energy, and pain without a clear cause. People may also occasionally have false beliefs or see or hear things that others ...

Trials have consistently shown that there is no advantage from routine imaging of non-specific low back pain and there are some potential harms. Imaging is instead recommended for cases of low back pain where there is a suspicion of an underlying medically serious disease, like cancer or infection.

The Australian Physiotherapy Association: tests

Number: 0648. Policy. Aetna considers autism spectrum disorder (ASD) evaluation and diagnosis medically necessary when developmental delays or persistent deficits in social communication and social interaction across multiple contexts have been identified and when the evaluation is performed by the appropriate certified/licensed health care professional.
