published within a volume of science fiction stories. We explore the ramifications of applying Natural Language Generation within a co-creative process, and examine where the co-creative setting challenges both writer and machine. We employ a character-level language model to generate text based on a large corpus

eral and creativity through science in particular, especially in early years education ([www.creative-little-scientists.eu](http://www.creative-little-scientists.eu)). However, there is empirical evidence that students do not appreciate the creative thinking required in doing science, and that they do not view science in general as a creative endeavour (see Schmidt, 2011).
