The Impact of Personality Traits and Employee Work-Related

Capacity building (or capacity development) is the process by which individuals and organizations obtain, improve, and retain the skills, knowledge, tools, equipment and other resources needed to do their jobs competently or to a greater capacity (larger scale, larger audience, larger impact, etc). Capacity building and capacity development are often used interchangeably.

single-issue to those tackling a variety of different issues. The paper begins with an overview of changes in the advocacy environment that are changing the way that advocacy

What Makes an Effective Advocacy Organization?

Discussion. Research evidence can serve as a critical decision-making tool in partnerships between patients and health professionals. However, as the framework suggests, without patient and consumer engagement in the design, planning, interpretation, and dissemination of research findings, it is unlikely that the broader consumer population will find research evidence useful, much less use it ...

Engaging patients and consumers in research evidence

Dr. Berger's article outlines the subject of employee/organizational communication, describing its importance and basic internal communication processes, networks and channels.
