Complexity characterises the behaviour of a system or model whose components interact in multiple ways and follow local rules, meaning there is no reasonable higher instruction to define the various possible interactions.. The term is generally used to characterize something with many parts where those parts interact with each other in multiple ways, culminating in a higher order of emergence ...

Here's a historical cipher mystery from 1948 that I found out about yesterday (apologies for being so slow on the uptake). It's a thoroughly perplexing affair from Australia, with an anonymous corpse that ended up embalmed, lots of red herrings (all deliberate, it would seem), a fragment from the Rubaiyat of Omar

1. Introduction. The first results on multi-component and high entropy , , , crystalline alloys were published in 2004, about 12 years ago. The two major, new concepts of this approach include opening a vast, unexplored realm of alloy compositions and the potential to influence solid solution phase stability through control of configurational entropy.

The present in-depth work examines the trustworthiness of Biblical history by using the Hebrew exodus from Egypt as a test case. More specifically, an examination of the exodus-pharaohâ€™s life will reveal whether Biblical history can be harmonized and synchronized with Egyptian history, and whether Biblical chronology is clear and trustworthy when relevant passages are interpreted literally.

Dead-color (Dutch: dood-verf) Dead-color (in Dutch, dood-verf), which is the equivalent of today's term "underpainting," is a more or less monochrome version of the final painting which gives volume, suggests substance, substantiates the principal compositional elements and distributes darks and lights. The lack of color used in the term probably explains the word "dead."
