UTILIZATION OF CONSTRAINED RESOURCES (continued) MANAGING CONSTRAINTS Processing more units actually demanded by customers through the bottleneck is the key to increased profits: â€¢ Produce only what can be sold. â€¢ Pay workers overtime to keep the bottleneck running after normal working hours.

Resource Availability - Impact If resources are available in abundance: Project accelerated to achieve shorter project duration If resources are severely limited: Delay in the project completion time If resources are readily available & excess premiums are not incurred to use them on the project, then project cost should be low.

### **COMPETING PROJECT CONSTRAINTS - PMTUTOR**

This assignment will determine potential resources and constraints for your prioritized draft objectives. Resources are what will be needed to resolve the problem. Constraints are limitations and restrictions.

Constraint satisfaction in a nutshell " domain filtering and local consistencies " search techniques Constraints for planning " constraint models " temporal reasoning Constraints for scheduling " a base constraint model " resource constraints " branching schemes 3 Constraint-based Planning and Scheduling

### **CONSTRAINT-BASED PLANNING AND SCHEDULING**

Tools to determine resources and constraints include existing data, professional judgment, literature searches, and secondary sources. When the level of detail requires more indepth data, inventories might include field mapping, sampling, lab analysis, drilling, measuring, and statistical modeling.

### **Step 3--Resources and Constraints - Eastgate**

Small companies are often faced with resource constraints -- in funding, technology, materials and more -- as they plan, organize, schedule and execute various projects. Most constraints of any ...

### **The Advantages and Disadvantages of Resource Constrained**

Goldratt, the originator of the Theory of Constraints (TOC), maintains that only the system's primary resource constraint(s) should be scheduled at 100% of capacity. All other resources should have excess capacity.

The following commands configure location constraints so that the resource Webserver prefers node example-1, the resource Database prefers node example-2, and both resources can fail over to node example-3 if their preferred node fails.
