Environmental issues in China are plentiful, severely affecting the country's biophysical environment and human health. Rapid industrialisation, as well as lax environmental oversight, are main contributors to these problems.. The Chinese government has acknowledged the problems and made various responses, resulting in some improvements, but the responses have been criticized as inadequate.

The concepts that seeded nanotechnology were first discussed in 1959 by renowned physicist Richard Feynman in his talk There's Plenty of Room at the Bottom, in which he described the possibility of synthesis via direct manipulation of atoms. The term "nano-technology" was first used by Norio Taniguchi in 1974, though it was not widely known.

The basic question at issue in the contemporary origins debate is whether or not the world was created. It could be tempting to simply put participants in the discussion into two groups "creationists and evolutionists" and leave it at that. Some on both sides of the issue would like to do exactly ...
